SUMMARY

Senior Software Engineer and Technical Lead with 5+ years of experience building scalable, high-performance software products across cloud infrastructure, billing systems, and web platforms. Strong background in Node.js, TypeScript, React, GraphQL, and system integrations. Proven ability to lead engineering efforts, mentor developers, and deliver production systems with strong performance and reliability requirements.

KEY SKILLS

Programming & Technologies: TypeScript, Node.js, JavaScript, Go, React, GraphQL, REST APIs, SQL

Web: Next.js, Express, WebSockets, Redux, Apollo Client, i18n, Ant Design, SCSS

Databases & Messaging: PostgreSQL, MySQL, MongoDB, Redis, BullMQ

Infrastructure & Tools: Docker, GitHub Actions, GitLab CI, Postman

AI Tools: Codex, Claude Code, GitHub Copilot

Languages: Russian (Native), English (C1), French (B1)

EXPERIENCE

Mar 25 – Feb 26	Co-Founder / Software Engineer	Irbis (ZenPrivacy)
	- Co-founded and built Zen, an open-source project with 4K+ GitHub stars - Optimized rule lookup across 100K+ filtering rules, making request matching up to 5x faster - Implemented cross-platform desktop functionality for Windows, macOS, and Linux - Built Node.js services and React internal tools for product operations and data management - Automated cross-platform desktop builds, packaging, and releases using GitHub Actions <i>Node.js / TypeScript / React / Go / PostgreSQL</i>	
Dec 24 – Mar 25	Software Engineer (Contract)	European ad-blocking products company
	- Partnered with a European ad-blocking products company serving 20M+ monthly active users - Expanded filtering engine coverage by adding cosmetic rule support - Implemented blocked-request analytics, aggregating 10K+ filtering events per hour - Diagnosed and fixed a filtering engine limitation, reducing matcher overhead by 50% and enabling correct exception-rule behavior - Improved Windows desktop responsiveness by optimizing tray and background event handling <i>TypeScript / React / Go / PostgreSQL</i>	
Nov 20 – Feb 25	Software Engineer / Technical Lead	PS Cloud Services (ps.kz)
	- Led fullstack development across cloud, hosting, and domain management products - Reduced client dashboard load time from 7s to 500ms by optimizing backend data access and legacy service integrations - Built queue-based billing workflows processing hourly usage and cost calculations for 10K+ customer accounts - Developed billing reports over 1M+ hourly transactions, aggregating usage, withdrawals, and transaction types across the backend and React dashboards - Mentored engineers and introduced code review practices <i>TypeScript / Next.js / React / MongoDB / MySQL / Redis / BullMQ</i>	
Jun 20 – Nov 20	Software Engineer	ForteBank
	- Built a data migration service for internal banking systems - Migrated spreadsheet-based data into Elasticsearch - Developed PL/SQL procedures to support internal business logic <i>Elasticsearch / Data migration / Oracle PL/SQL / Banking systems</i>	

Jun 19 – Mar 20

Quality Assurance Engineer

EPAM Systems

- Performed manual and automated testing for web applications
- Analyzed defects and collaborated with developers
- Improved QA workflows by creating kubectl-based Bash scripts for deployed environments

Jira / Confluence / Postman
